

AGENT OPERATIONS DASHBOARD

How the agent researches, writes, tests, and ships the weekly women-in-AI report

A live view of the autonomous research pipeline — covering **women & AI** across research, representation, and the featured healthcare-R&D track. Every Monday at 09:00 CST it picks a topic, gathers cited statistics, drafts the report, runs an independent QA review, and emails the result to the Medtronic team.

FEATURED TRACK
Healthcare R&D
7-topic priority queue

The report pipeline four agents/stages, every Monday — left to right

1

RESEARCH AGENT

Pick topic & gather evidence

Reads the brain, selects this week's topic (featured track first), and fans out web searches for primary, cited statistics — no number without a source.

Last: 21 sources, 9 statistics on women in AI leadership at big tech

→

2

REPORT WRITER

Draft report + white paper

Writes the 1,500–3,500-word markdown report and a presentation white paper with inline SVG charts — in the established WAI format.

Last: 3,331 words · 3 charts · md + HTML + PDF

→

3

WAI-TEST AGENT

Review: format · content · data

Independently scores the report against 18 checks across three dimensions. It never edits — it gates. Nothing ships until the verdict is **SHIP**.

Last: ✓ SHIP · 100%

→

4

SCHEDULER & EMAIL

Send Mon 09:00 CST

On a passing review, the cron routine emails the Word + white-paper files to the Medtronic distribution list, then logs the run.

To: 4 Medtronic recipients · .docx + .html

Full data dashboard

Key observations the agent surfaced

- Big tech reports **26–33% women in leadership** — but women hold **<14% of senior AI executive roles** and **8.6% of CTO seats**. Women are 86% of HR execs at AI firms, 22% of technical execs.
- The trend broke in 2022: women's share of **new C-suite hires plateaued at ~27%**; the S&P 500's female board share fell in 2025 for the first time in a decade.
- Google, Meta & Microsoft published no diversity report in 2025** — ending Google's 11-year series at 32.8%. No frontier AI lab has ever published diversity data.
- What works, measured: **sponsorship (~2× promotion odds)**, removing self-nomination gates, and public dated targets (Accenture hit 30% women MDs).
